1. EXECUTIVE SUMMARY

The African Continental Free Trade Area (AfCFTA) has opened up vast opportunities for businesses across Africa. To leverage these opportunities, Fideros aims to create a comprehensive digital platform to facilitate B2B interactions, streamline operations, and enhance trade efficiency within the continent. This whitepaper details our vision, the market potential, the functionalities of Fideros, and the structure of our Initial Coin Offering (ICO).

Fideros is a French company with a bold vision: to simplify, secure, and accelerate intra-African and Africa- Europe trades through the use of Web3, AI, and a hybrid blockchain infrastructure. With its already developed MVP and strong technological foundation, Fideros is launching its native token FID on the Solana blockchain to fund the next phase of growth, including mobile development, international expansion, and smart contract automation.

2. PROBLEM & MARKET OPPORTUNITY

Africa's business landscape is rapidly evolving, with significant growth in cross-border trade and digital adoption. However, businesses still face challenges such as inefficient procurement processes, lack of reliable business information, and limited access to financial services. SMEs are underrepresented in international commerce due to the absence of reliable, affordable digital platforms. Fideros aims to address these challenges by providing a robust B2B platform that integrates a marketplace, supplier directories, digital contract management, and financial information services.

Blockchain offers a transparent, secure, and decentralized solution, allowing Fideros to act as a neutral, intelligent intermediary.

3. SOLUTION: THE FIDEROS PLATFORM

Fideros is a B2B platform designed to facilitate seamless business interactions across Africa. Fideros combines a powerful digital marketplace with smart services:

- Business directory with verified profiles
- RFQ (Request for Quotation) system
- B2B Marketplace
- Certification & document verification
- Integrated escrow via smart contracts (coming phase)
- Collaborative forums and digital signature module (roadmap 2026)

Fideros is built for mobile-first use in emerging markets and structured around a powerful Web API with JSON messaging. The architecture ensures interoperability and performance.

4. VISION AND MISSION

Vision: To become the leading B2B platform in Africa, driving trade efficiency and business growth through digital innovation.

Mission: To provide African businesses with the tools and services needed to streamline operations, enhance visibility, and foster cross-border collaborations.

In short, create a secure business pipeline between companies.

5. TECHNICAL ARCHITECTURE

- **Data:** CouchDB
- **Private Blockchain :** Hyperledger platform
- **Public Blockchain :** Solana Chain
- **Messaging:** Kafka Raft
- **Communication:** SignalR / WebSockets
- **Security:** Role-based access, end-to-end encryption
- **Scalability:** Modular microservices

Smart contract modules on Solana will support transactions, staking, and governance.

6. TOKENOMICS

	Description
Token Name	Fideros Token (FID)
Blockchain	Solana (SPL Token Standard)
Total Supply	1,000,000,000 FID

1. TOKEN DISTRIBUTION

	Description
Total Tokens	1,000,000,000 FID
Distribution	➤ 10% Public ICO (100M FID)

	<ul style="list-style-type: none"> ➤ 15% Team (vested over 24 months) ➤ 5% Advisors (vested over 12 months) ➤ 20% Development Reserve ➤ 10% Strategic Partnerships <p>40% Ecosystem Incentives (airdrops, staking, referral rewards, DAO governance)</p>
--	--

2. TOKEN UTILITY

Utility	Description
Transaction Fees	Pay and reduce fees on marketplace and services.
Staking & Reputation	Lock tokens to boost on-chain reputation and trust score.
Access & Premium	Unlock advanced features, premium visibility, and financial services.
Rewards	Earn tokens through verified trades, positive feedback, and contributions.
Governance	Participate in platform decisions and future developments.

3. ICO GOALS

- Soft Cap: €300,000
- Hard Cap: €1,000,000
- Token Price: ~0.01€ at launch
- Accepted: SOL, USDC (KYC light required)

7. ROADMAP

- ✅ MVP complete & SAS registered
- 🔄 Q4 2025: ICO Launch + Private Sale
- 📱 Q1 2026: Mobile & English version development
- 🚀 Q2 2026: Beta launch V1 + Initial CEX/DEX listing
- 🔒 Q3 2026: Escrow system, certification module, legal DAO research
- 🌐 2027+: Smart contracts, digital signature, full Web3 ecosystem

8. USE OF FUNDS

INITIAL FUNDS ALLOCATION (SEED ROUND: €1,200,000)

	Description
Platform Development	35% Development (mobile app, backend modules)
Marketing and Community Building	20% Marketing & Community
Operational Expenses	15% Operations
Legal and Compliance	15% Legal & Compliance
Partnership	10% Partnerships
Provisioning	5% Liquidity provisioning

9. TEAM

The Fideros team is made up of passionate and experienced experts in the fields of blockchain, e-commerce, software development and marketing.

CORE TEAM

- **Soliyou TIAMIOU** - Co-founder, Senior Developer (C#, Rust, Solana). Experienced entrepreneur with a background in B2B platforms, digital transformation and Blockchain expert. Blockchain expert and software architect with extensive experience in building scalable solutions.
- **Omar TIAMIOU** - Co-founder, Operations specialist with a strong background in international business and trade. Advisory board in setup phase – legal, blockchain experts, and B2B mentors.
- **Name** - Marketing professional with a track record of successful campaigns in tech startups.

ADVISORY BOARD

- **[Advisor 1]** - Industry expert in African trade and commerce.
- **[Advisor 2]** - Legal advisor with experience in blockchain and fintech regulations.

10. RISK FACTORS

- Market risk: crypto volatility
- Regulatory risk: evolving rules on tokens in EU/AFR
- Execution risk: platform scale & partner onboarding

Mitigated by experienced founders, staged roadmap, and agile delivery.

11. LEGAL AND COMPLIANCE

Fideros is committed to operating within the legal frameworks and regulations of all jurisdictions in which it operates. We have engaged legal experts to ensure compliance with international standards and to provide a secure environment for our users and investors.

FID is a utility token. The ICO will follow EU regulations on light KYC and AML. Full legal notice and terms of use available before public sale. Jurisdictions with token bans will be excluded.

KEY LEGAL CONSIDERATIONS

- **Regulatory Compliance:** Adherence to financial and data protection regulations.
- **User Protection:** Implementing robust security measures to protect user data and assets.
- **Transparency:** Regular audits and transparent reporting of financial and operational activities.

12. CONCLUSION

Fideros is poised to transform the B2B landscape in Africa by providing a comprehensive platform that addresses key business challenges.

Our ICO will enable us to develop and scale this platform, driving efficiency, growth, and innovation across the continent. We invite you to join us on this journey to revolutionize African trade and business interactions.
